👤 Summary

I am Software Engineer with experience building responsive web applications and digital products. Skilled in frontend development, UI/UX design, and digital marketing, with a passion for turning ideas into intuitive and meaningful user experiences. Experienced in working on both independent and collaborative projects, from research and design to development and deployment. Currently completing a Software Development Specialization at Uncommon.org while building projects across education, aviation, tourism, and mobility.

Software Developer with practical experience designing and developing responsive digital products using JavaScript, React, Python, HTML, and CSS. Strong foundation in frontend development, UI/UX design, and user-centred problem solving, demonstrated through independent and collaborative projects.

Experienced in translating ideas and designs into functional web experiences, working with Git and GitHub, and deploying projects using Vercel. Currently completing a Software Development Specialization at Uncommon.org and seeking an opportunity to contribute, learn from experienced professionals, and grow within a collaborative technology team.

Projects

Launch Path, Student Career & Internship Platform

Designed a platform concept that helps students discover internship opportunities and career resources through intuitive user journeys and responsive interfaces.

Aeris, Aviation Intelligence Platform

Created an aviation-focused digital platform that transforms complex industry information into accessible, engaging experiences for users.

VicFalls One, Digital Tourism Ecosystem

Made an all in one tourism platform connecting visitors with accommodation, activities, transportation, and local experiences across Victoria Falls.

Flyta Vertex, Airport Transfers & Tourism Mobility Platform

Designed a platform that simplifies transportation between airports, hotels, and tourism destinations through streamlined booking experiences.

Mbano Manor, Luxury Hospitality Website | Frontend Development & UI/UX

- Designed and developed a premium hospitality web experience focused on communicating brand value, presenting experiences clearly, and guiding visitors through a structured user journey.
- Designed responsive layouts with a strong visual hierarchy and clear calls to action.
- Translated UI/UX concepts into a functional frontend experience.
- Focused on accessibility, responsiveness, and intuitive navigation.
- Deployed the project to Vercel as part of a professional portfolio.
- Technologies: HTML, CSS, JavaScript, Figma, Vercel

Smoke House, Restaurant Website Redesign | Frontend & UI/UX

- Redesigned a restaurant website concept to strengthen its digital presence and create a clearer path for users to discover information and take action.
- Improved information architecture and content hierarchy.
- Designed responsive desktop and mobile layouts.
- Created a visual direction aligned with the restaurant's identity.
- Combined Figma design work with frontend implementation.
- Technologies: HTML, CSS, JavaScript, Figma

VicFalls Televivi, Community Media Platform | Collaborative Development

- Contributed to a digital media platform designed to improve access to local news, programmes, videos, and community content in Victoria Falls.
- Structured content around discoverability and user navigation.
- Contributed to responsive frontend development.
- Worked with Git and GitHub in a collaborative development environment.
- Focused on accessible content presentation and clear information architecture.
- Technologies: HTML, CSS, JavaScript, Git, GitHub

PROFESSIONAL DEVELOPMENT

Self-Directed Software Development

- Continuously build and deploy practical projects to strengthen development and design skills.
- Develop knowledge in JavaScript, React, Python, and modern web development.
- Apply Git and GitHub workflows across personal and collaborative projects.
- Combine software development, UI/UX design, and digital marketing to create user-centred products.
- Research and experiment with emerging technologies and best practices.
